### 1 [Efficient transparent application recovery in client-server information systems](#)

David Lomet, Gerhard Weikum

 June 1998 **ACM SIGMOD Record , Proceedings of the 1998 ACM SIGMOD international conference on Management of data SIGMOD '98**, Volume 27 Issue 2

Publisher: ACM Press

Full text available: pdf(1.62 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Database systems recover persistent data, providing high database availability. However, database applications, typically residing on client or "middle-tier" application-server machines, may lose work because of a server failure. This prevents the masking of server failures from the human user and substantially degrades application availability. This paper aims to enable high application availability with an integrated method for database server recovery and tra ...

### 2 [Lessons learned from the novell and groupWise upgrade of the summer 2003 or "what we did on our summer vacation!"](#)

Robert L. Barley, Yancy Phillips

 October 2004 **Proceedings of the 32nd annual ACM SIGUCCS conference on User services**

Publisher: ACM Press

 Full text available: pdf(174.72 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

This presentation will focus on the effects a recent major hardware and software upgrade had on the Indiana State University end user community and how collaboration between Technical and User Services resulted in a positive experience for the end user community. There were many hours of overtime put into this project and lots of concerns from User Services personnel about having to go out and "touch" each computer to facilitate necessary changes. The effects of the unsolicited visits produce ...
